Objective

- Dedicated professional seeking a Software Engineering role which encourages excellent creative work and client service.

Work experience

Junior Software Engineer 06/2019 – present
Road to Hire

- For the past 6 months I spent time studying and learning to become a full stack engineer at Road to Hire. I have learned several coding languages and libraries. I have built several applications in each language including a full stack E-commerce website and a Web Application for the non profit company LifeSports.

Investment Service Specialist 07/2018 – 10/2018
MassMutual

- Created commission codes for sales reps to determine the percentages that would be credited to each broker.
- communicated the code information via email to all brokers involved and answered any phone or email inquiries they may have regarding the code.
- Also, I was responsible for the quality control of commission codes to prevent or reconcile any errors on commission transactions.

Quality Control Analyst 03/2018 – 06/2018
Movement Mortgage

- Reverified all employment and assets that clients used to apply for mortgage loans. Met all deadlines for post closing reviews.
- Performed ongoing reviews as needed to ensure all data was maintained in the applicable database required.

Education

High School Diploma 08/2010 – 06/2014
Northwestern High School

Computer Science 03/2019 – present
Southern New Hampshire University

Technical Skills

Programming Languages

HTML
CSS
SASS
JavaScript
NodeJS
React
C#

Data Management

MYSQL
MongoDB

Data Modeling

JSON

Projects

E-Commerce Platform

- Built a Full Stack platform using html, css, Javascript, and react. I also built a database for the platform using MYSQL and connected the database using NodeJS.

Lifesports Platform

- I collaborated with two team members to build a web application for the start up company LifeSports. This web application was built in React, MongoDB, NodeJS, Express, Morgan and SASS.

Random Color Generator

- Built a small application in JavaScript that generates random colors.

Portfolio

- Built my portfolio to showcase my experience and projects using HTML, SASS, and JavaScript.
